PHAM XUAN KHANH
President

Hanoi Vocational College Of High Technology is a public training institution belonging to Hanoi People's Committee, founded according to the declaration No 808/QĐ of Ministry Labor Invalids and Social Affairs on 25th of June. This is one of the key projects in the 1000th anniversary of Thang Long - Hanoi.

The college is invested to be built synchronously, modernly with training equipments according to uniform national and international standards in order to train and supply with high quality human resources for Hanoi Capital and the Northern key economic region. Doing applied research activities and technology transfer; combining production, sales and service, building relationships between the college and businesses is always carried out.

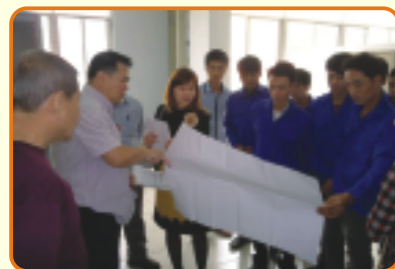

Standard training program and advanced foreign and domestic curriculum are used so as to meet the training objectives of comprehensive knowledge, skills and attitudes. The college is also paying special attention to English language training, Information Technology, soft skills and industrial working style. After graduation, students have the opportunities to enroll in continuing education program, or get job placement in agencies or domestic and foreign enterprises as well as the high-tech or labor export region.

The year 2010 was the first year of admission with 750 students enrolling the first course. The scale of students is in the expectation of 8000 students by 2014 and the number of teaching staff members is up to 490. With the development orientation of a vocational training college to international standards and the pioneering of high-quality training, Hanoi Vocational College of High Technology always warmly welcomes the students and teaching staff to learn and work in the college. A new environment based on solid foundation of unity will be favorable for us to promote creativity to provide high effectiveness for individuals and for collectives of Hanoi Vocational College of High Technology.

TRAINING OBJECTIVES

- Training and supplying highly qualified employees for Hanoi Capital and the Northern key economic region. Being the leading training center for high technology; testing and ranking to provide students with degrees and certificates.
- Becoming the center for organizing job fairs and preparing students for national vocational exams.
- Allowing students to further their education with a bachelor degree within the college or another university.
- Training, conducting scientific research and transferring technology as well as offering other business services.

CONTINUING EDUCATION PROGRAM

Dantri - VN this morning 10/28, the Ministry of Education and Training and the Ministry of Labor, Invalids and Social Affairs signed a circular granting students the permission to further their education.

This document is applied for vocational secondary schools, vocational college, University and institutes. Therefore, students who want to further their education must have a certificate provided by the vocational school or college. Students who have just graduated from high school must have enough knowledge and finish a graduation exam with sufficient marks according to the rules from the Ministry of Education and Training.

The process of recruiting students for continuing education programs for inter-college and inter-university will be done following the regulations from the Ministry of Education and training.

The College and University, who are assigned to carry out the continuing education programs for inter-college and inter-university, must follow all the regulations issued by the Ministry of Education and Training. The curriculum and the program for continuing education have been completed based on the rules and the criteria of the Ministry of Education and Training.

The program for continuing education, which helps fulfill the insufficient knowledge and skills of the students without repeating information that students have already learnt, must be established based on the framework set out by the Ministry of Education and Training to ensure that students are provided with sufficient knowledge.

The duration for continuing education from primary to intermediate levels will be from one and a half to two years and from college to University will be from three to four years. Permission for creating the continuing education program must be approved by the Ministry of Education and Training.

Continuing education must be organized based on the regulations for training at universities and colleges issued by the Ministry of Education and Training.

Granting students with degrees after completing a continuing education program for inter-college and inter-university will be done based on the regulations issued by the Ministry of Education and Training.

COOPERATION BETWEEN COLLEGE AND BUSINESSES

Being pioneer in HIGH QUALITY VOCATIONAL TRAINING

TRAINING ACTIVITIES ASSOCIATE WITH SOCIAL NEEDS AND COOPERATION BETWEEN BUSINESSES AND SCHOOLS

Hanoi vocational college of high technology promotes doing research and applying science and technology into real-life production; associating training with scientific research; combining practice with production and offering services to effectively utilize the existing infrastructure and capacity of teachers, students and pupils to improve training quality, meeting the requirements of society.

The college has association with companies, enterprises, universities, research institutes at home and abroad; association with other social organizations to ensure a close relationship between education and economic development in Viet Nam and around the world.

The college diversifies the types of training through cooperation in continuing education and retraining by updating knowledge for the employees at the request of the companies and the employees themselves in order to create potential employees and career opportunities for students.

The college provides workforce training in association with the employer, labor supply for production and business units, to promote practice and apply learning to production. All types of the training process are meant to help students find employment after graduating and allow them to contribute to improving the effectiveness of the school.
