

**Research Funding Opportunity : UK – Indonesia Science & Technology
Fund : Newton Institutional Links -KLN/INSINAS****Opportunity**

The Newton Fund Indonesia is an official collaborative development programme between the UK and Indonesian Government in the area of research and innovation. The 7 year programme, with up to £10 million UK funding for Indonesia was launched in 2014.

The British Council is the programme delivery partner for the Newton Fund specifically for the people pillar.

The British Council in Indonesia is working in partnership with a number of relevant Indonesian government organisations and funding bodies to deliver programmes that benefit Indonesian researchers. At the moment, the Newton Fund Indonesia is the official partner for Indonesia Ministry of Research, Technology and Higher Education (MRTHE) to deliver UK-Indonesia Science & Technology Fund. This partnership was launched on 23rd of March 2016.

About Newton Institutional Links -KLN/INSINAS

Grants for establishing links between higher education, research institutions and businesses with the aim of translating research to drive economic development and social welfare in partner countries.

Newton Fund with the Ministry of Research, Technology and Higher Education opens the opportunity to support the joint research translation work that led by Indonesia – UK universities/research institutions. To also support the quality of Indonesia research, expected output of the project is international publication.
