丙组 现代文阅读 (18%)

细读下列两篇文章，然后按要求回答问题。

[文章 1]

素面朝天。我在白纸上郑重写下这个题目。夫走过来说，你是要将一碗白皮面，对着天空吗？

我说有一位虢国夫人，就是杨贵妃的姐姐，她自恃美丽，见了唐明皇也不化妆，所以叫……夫笑了，说，我知道。可是你并不美丽。

是的，我不美丽。但素面朝天并不是美丽女人的专利，而是所有女人都可以选择的一种生存方式。

看着我们周围。每一棵树、每一叶草、每一朵花，都不化妆，面对骄阳、面对暴雨、面对风雪，它们都本色而自然。它们会衰老和凋零，但衰老和凋零也是一种真实。作为万物灵长的人类，为何要将自己隐藏在脂粉和油彩的后面？

见一位化过妆的女友洗面，红的水黑的水蜿蜒而下，仿佛洪水冲刷过水土流失的山峦。那个真实的她，像在蛋壳里窒息得过久的鸡雏，渐渐苏醒过来。我觉得这个眉目清晰的女人，才是真正的朋友。片刻前被颜色包裹的那个形象，是一个虚伪的陌生人。

脸，是我们与生俱来的证件。我的父母凭着它辨认出一脉血缘的延续；我的丈夫，凭着它在茫茫人海中将我找寻；我的儿子，凭着它第一次铭记住了自己的母亲……每张脸，都是一本生命的图谱。连脸都不愿公开的人，便像捏着一份涂改过的证件，有了太多的秘密。所有的秘密都是有重量的。背着化过妆的脸走路的女人，便多了劳累，多了忧虑。

化妆可以使人年轻，无数广告喋喋不休地告诫我们。我认识的一位女郎，盛妆出行，艳丽得如同一组霓虹灯。一次半夜里我为她传一个电话，门开的一瞬间，我惊愕不止。惨亮的灯光下，她枯黄憔悴如同一册古老的线装书。“我不能不化妆。”她后来告诉我。“化妆如同吸烟，是有瘾的，我已经没有勇气面对不化妆的我。化妆最先是为了欺人，之后就成了自欺。我真羡慕你啊！”从此我对她充满同情。我们都会衰老。我镇定地注视着我的年纪，犹如眺望远方一幅渐渐逼近的白帆。为什么要掩饰这个现实呢？掩饰不单是徒劳，首先是一种软弱。自信并不与年龄成反比，就像自信并不与美丽成正比，勇气不是储存在脸庞里，而是掌握在自己手中。化妆品不过是一些高分子的化合物、一些水果的汁液和一些动物的油脂，它们同人类的自信与果敢实在是不相干的东西。犹如大厦需要钢筋铁骨来支撑，而决非凡华而不实的竹竿。

常常觉得化了妆的女人犯了买椟还珠的错误。请看我的眼睛！浓墨勾勒的眼线在说。但栅栏似的假睫毛圈住的眼波，却暗淡犹疑。请注意我的口唇！樱桃红的唇膏在呼吁。但轮廓鲜明的唇内吐出的话语，却肤浅苍白……化妆以醒目的色彩强调以至强迫人们注意的部位，却往往是最软弱的所在。

磨砺内心比油饰外表要难得多，犹如水晶与玻璃的区别。

不拥有美丽的女人，并非也不拥有自信。美丽是一种天赋，自信却像树苗一样，可以播种可以培植可以蔚然成林可以直到地老天荒。

我相信不化妆的微笑更纯洁而美好，我相信不化妆的目光更坦率而直诚，我相信不化妆的女人更有勇气直面人生。

假若不是为了工作，假若不是出于礼仪，我这一生，将永不化妆。

(毕淑敏《素面朝天》)

[文章 2]

阶前看不见一茎绿草，窗外望不见一只蝴蝶，谁说是鹁鸽箱里的生活，鹁鸽未必这样枯燥无味呢。秋天来了，记忆就轻轻提示道：“凄凄切切的秋虫又要响起来了。”可是一点影响也没有，邻舍儿啼人闹，弦歌杂作的深夜，街上轮震石响，邪许^①并起的清晨，无论你靠着枕头听，凭着窗沿听，甚至贴着墙角听，总听不到一丝秋虫的声息。并不是被那些欢乐的劳困的宏大的清亮的声音淹没了，以致听不出来，乃是这里根本没有秋虫这东西。**呵，不容留秋虫的地方！秋虫所不屑居留的地方！**

若是在鄙野的乡间，这时候满耳朵是虫声了。白天与夜间一样地安闲；一切人物或动或静，都有自得之趣；嫩暖的阳光和轻淡的云影覆盖在场上。到夜呢，明耀的星月或者徐缓的凉风看守着整夜，在这境界这时间唯一的足以感动心情的就是虫儿们的合奏。它们高、低、宏、细、疾、徐、作、歇，仿佛曾经过乐师的精心训练，所以这样地无可批评，踌躇满志。其实它们每一个都是神妙的乐师；众妙毕集，各抒灵趣，哪有不成人间绝响的呢。虽然这些虫声会引起劳人的感叹，秋士的伤怀，独客的微喟，思妇的低泣；但是这正是无上的美的境界，绝好的自然诗篇，不独是旁人最欢喜吟味的，就是当境者也感受一种酸酸的麻麻的味道，这种味道在另一方面是非常隽永的。

大概我们所蕲求^②的不在于某种味道，只要时时有点儿味道尝尝，就自诩为生活不空虚了。假若这味道是甜美的，我们固然含着笑意来体味它；若是酸苦的，我们也要皱着眉头来辨尝它：这总比淡漠无味胜过百倍。我们认为**最难堪而极欲逃避的，惟有这一个淡漠无味！**

所以心如槁木不如工愁多感，迷朦的醒不如热烈的梦，一口苦水胜于一盏白汤，一场痛哭胜于哀乐两忘。但这里并不是说愉快乐观是要不得的，清健的醒是不必求的，甜汤是罪恶的，狂笑是魔道的。这里只说**有味总比淡漠远胜**罢了。

所以虫声终于是足系恋念的东西。何况劳人、秋士、独客、思妇以外还有无量数的人，他们当然也是酷嗜味道的，当这凉意微逗的时候，谁能不忆起那美妙的秋之音乐？

可是没有，绝对没有！**井底似的庭院，铅色的水门汀地**，秋虫早已避去惟恐不速了。而我们没有它们的翅膀与大腿，不能飞又不能跳，还是死守在这里。想到“井底”与“铅色”，觉得象征的意味丰富极了。

(叶圣陶《没有秋虫的地方》)

注：① 邪许（yé hǔ）：象声词。劳动时众人协同用力发出的呼声。

② 蕲求：祈求。

[课内文言文]

庆历四年春，滕子京谪守巴陵郡。越明年，政通人和，百废具兴。乃重修岳阳楼，增其旧制，刻唐贤、今人诗赋于其上。属予作文以记之。

予观夫巴陵胜状，在洞庭一湖。衔远山，吞长江，浩浩汤汤，横无际涯；朝晖夕阴，气象万千。此则岳阳楼之大观也。前人之述备矣。然则北通巫峡，南极潇湘，迁客骚人，多会于此。览物之情，得无异乎？

若夫霪雨霏霏，连月不开，阴风怒号，浊浪排空；日星隐耀，山岳潜形，商旅不行，樯倾楫摧；薄暮冥冥，虎啸猿啼。登斯楼也，则有去国怀乡，忧谗畏讥，满目萧然，感极而悲者矣。

至若春和景明，波澜不惊，上下天光，一碧万顷；沙鸥翔集，锦鳞游泳；岸芷汀兰，郁郁青青。而或长烟一空，皓月千里，浮光跃金，静影沉璧，渔歌互答，此乐何极！登斯楼也，则有心旷神怡，宠辱偕忘，把酒临风，其喜洋洋者矣。

嗟夫！予尝求古仁人之心，或异二者之为，何哉？不以物喜，不以己悲；居庙堂之高，则忧其民；处江湖之远，则忧其君；是进亦忧，退亦忧。然则何时而乐耶？其必曰：先天下之忧而忧，后天下之乐而乐乎。噫！微斯人，吾谁与归？

SECTION A SUMMARY WRITING (15%)

Read the following passage carefully. Write a summary on:

- the reasons why people procrastinate,
- its ill effects, and
- how to overcome procrastination

Your summary should be in continuous writing and should not be longer than 150 words. Credit will be given for the use of own words. State, in brackets, the number of words you have written.

Procrastination is the act of putting off doing something important till a later time or date. Most of us procrastinate now and then. We may make big plans such as cleaning the house or starting on a diet but never carry them out. Some of us blame others or circumstances when we procrastinate. While it is only an occasional problem for most, procrastination can be a chronic stumbling block for others.

There are many reasons for procrastinating. The first is that we may dread taking on a difficult or boring job. When a task is perceived as long or difficult, many will procrastinate simply because there is no immediate gratification. For example, it will take months to lose those ten pounds or it will take tons of energy to clear the room. Putting off a diet programme one more day will not make much difference. Sleeping in a messy room for another day won't make a difference, and the list goes on.

Besides that, fear of failure is also another reason why we procrastinate. This fear often comes into play at school where performance is evaluated and can affect our future success. A student may put off studying for a test until the last minute. Lack of time spent for studying is a more desirable explanation for failure than lacking the intelligence to learn the material.

Procrastination causes stress, anxiety and a feeling of failure. Students who fear failure ultimately become anxious, and stressful, and tend to fail when they do not prepare for tests or start projects on time. Employees who begin tasks at the last minute rarely perform as well as their non-procrastinating colleagues. Putting off a diet programme ultimately adds to the number of pounds you need to lose to be healthy, thus, making the job that much harder to accomplish.

To overcome procrastination, first, figure out why you are procrastinating. Is it fear of failure or lack of confidence? Write down all the reasons why putting off your project will bring you one step closer to failure. Does it make sense to put it off any longer? NO.

Next, break down the task into smaller jobs. If it is a thirty-page paper due in two weeks, write down a goal of finishing three pages a night. After you have finished your nightly quota, give yourself a reward of some sort. Watch your favourite television programme or have a hearty meal.

Those of us who procrastinate on a day-to-day basis need a realistic 'to-do' list. Keep the list with you and stick to the order. Cross things off as they are accomplished.

Tell your friends and family about your goals. If you have someone asking you how your diet is coming along, it is more difficult to cheat. If you have a major project to do, ask a friend to help keep you on the task by monitoring you frequently.

In conclusion, procrastination can cause you to miss opportunities and sabotage your future. Remember the saying, 'Procrastination is the thief of time' and stop procrastinating!

1. Although more and more women are rising to higher positions, there are still many deep-rooted prejudices and double standards that keep them from achieving the very top positions. Companies may say that they value interpersonal skills, but they still look for a leader who is decisive and a risk taker. These qualities are perceived as being mainly masculine, and a new study has shown that women may be penalised for having the same attributes. Although women have proved that they are capable of leading a company, it seems that they will not get the chance to do so unless their superiors are prepared to enter the twenty-first century.

- A Men are better at taking the lead.
 - B The main issue is gender discrimination.
 - C Women make better managers than men.
 - D The main theme is masculine and feminine issues.
2. For a growing number of environmentalists, the humble plastic bag has become public enemy number one—an unnecessary evil that must be stopped. The only people who have a good word to say about plastic bags are the owners of the plastic-bag industry. They claim that plastic bags are nowhere near the world's worst environmental problem. They say that the reason they are under attack is because they are an easy and emotive target that reflects the individuals' guilt about general environmental responsibility. So who is right?
- A The plastic bag has posed an unnecessary threat to the environment.
 - B Plastic-bag industry claims that plastic bags are not the world's worst environmental problem.
 - C The conflicts occur between plastic-bag industry and the guilty users of plastic bags who put the blame on the producers of plastic bags.
 - D The plastic-bag industries are under attack because they are an easy and emotive target that each individual can think of without any hesitation.

3. The piranha is a much-maligned fish. Most people think that this is a deadly creature that crowds the rivers and creeks of the Amazon rainforest looking for victims to tear apart. And woe betide anyone unfortunate enough to be in the same water with a shoal of piranhas. It takes only a few minutes for the vicious piranha to reduce someone to a mere skeleton.

The truth is that the piranha is really a much more misconstrued animal than the mindless killer portrayed in the media. In fact, piranhas are a group made up of roughly twelve different species. Each piranha species occupies its own ecological niche. One species takes chunks out of the fins of other fish. Another type eats fruits falling from trees into the river. Each piranha species plays a unique role in the ecology of the rainforest floodplains. So what would you do the next time you hear someone talking about the “deadly piranha”? You can remind them that the piranha is not always the notorious killer that the popular nature television shows would have us believe.

- A The text describes two different species of piranhas.
- B The primary purpose of the author is to correct misconceptions about the piranha.
- C The author tries to illustrate the importance of piranhas in the rainforest ecology.
- D The passage informs the reader on what to say if someone describes the piranha as “deadly”.

4. Have you ever wondered how people’s personalities and behaviours are formed? Two distinct schools of thought on the matter have developed and they differ in their approaches. The dispute is often referred to as nature and nurture. Supporters of nature believe that our personalities and behaviour patterns are largely determined by biological and genetic factors and our environment has little to do with our abilities, characteristics, and behaviours. Advocates of the nurture theory claim that our environment is more important than our biologically based instinct in determining how we will act as they see humans as beings whose behaviour is almost completely shaped by their surroundings. Neither of these theories can yet fully explain human behaviour.

- A A person’s instincts have little effect on his actions.
- B There are a lot of similarities between the two theories.
- C A person’s characteristics can be hereditary or cultivated.
- D It is impossible to explain why we possess certain characteristics.

5. Both Sam's parents worked in towns far from home where their son was boarding and led lives that were as busy as the lives of the other parents in the village. Sam found direction from these sources: the explicit rules laid down by the school resident matron and the implicit rules that governed his relationships with his peers. He was further guided by the strong value system inculcated over the years when the family spent time together at home. Sam was thus in a position to make the right decisions most of the time, gaining support and reward from those in authority over him. His sources of direction were sufficiently strong to create a safe path through his teenage years.

- Growing Up

- A Sam attributed his virtuous character to his pillars of strength at school or his friends but none from his family.
- B Sam attributed his virtuous character to his own personal growth as a student staying away from home as guidance was not made possible to him.
- C Sam attributed his virtuous character to himself and the specific rules governing his relationship with his friends as well as guidance from his family.
- D Sam attributed his virtuous character to the school and the unreserved rules governing his relationship with his friends as well as guidance from his family.

Part II Vocabulary (10%)

*Read the following passage carefully and choose the most appropriate meaning of each word or phrase printed in **bold** as used in the passage.*

What are the special memories of your childhood? Joanne's routine reminds me that **nostalgia** can do a lot to help you unwind. If you ask our daughters what they remember, their first answer would be "freshly-popped popcorn". The fragrance of popping corn would **permeate** the house, as Jack would regularly make huge bowls of it. This was before the days of automatic 5 poppers or microwave popcorn. Jack just poured the corn into a big frying pan on the stove and shook it **vigorously**. The smell was even better than what you would find in movie theatres, and the house was filled with wonderful aroma.

When I think of the smells that made my childhood special, I remember running home for lunch rather than eating in the school cafeteria because we lived only two blocks away. The 10 winter days in Michigan were cold and **blustery**, and I could still feel the crunch of the snow under my galoshes as I hurried home, **often with the cold biting my face** and my 'babushka' getting all snowy as I made my way through the **drifts**.

I would run up the steps into our house, and as I came through the door, I would smell that wonderful homemade tomato soup, which Mom had canned the summer before. Her sauce 15 was so thick that it would be equivalent to what people call the salsa today. Mom always made a lot of it. Canning it in old glass jars and then **stringing them** in the root cellar.

The sauce was her special blend, and along with onions, peppers and tomatoes, of course. It made her soup **unforgettable**. How I would love to come in and out of the biting cold wind into that warm house and stand over the floor **register**, feeling the heat flow up around me. And 20 then I would sit down to a bowl of **steaming** hot tomato soup. What a delight! It was worth the freezing hike home just to smell that delicious soup.

Part III Comprehension (10%)

Read the following passage carefully and then answer the questions that follow. Select the best answer for each question from options A, B, C or D.

It was a strange scenario: three people walked in together. They kept circling the buffet table, pointing to this and that and then the ones who appeared to be the mother and son, seated themselves at a table and waited. Much to the amazement of everyone present in the Premier Lounge at KLIA, the third person, a young Indonesian girl, began to serve the pair. Back and forth she went, carrying plates of their 'chosen' food to the two persons who seemed perfectly capable of serving themselves but chose not to.

There were many in the lounge who found it hard to mask their shock and disgust at what they were witnessing. The only ones who did not bat an eyelid were the Malaysians so accustomed to this culture of maids attending to their employers hand and foot. However, it was embarrassing all the same.

Poverty in neighbouring countries, coupled with a booming economy in Malaysia, has given rise to a strange phenomenon of entitlement amongst Malaysians. It has suddenly become unthinkable, almost disgraceful to be seen attending to menial household chores. The maid is the status symbol to announce that some things are beneath our dignity to attend to!

Serious repercussions have begun to manifest themselves in our society as a result of this 'phenomenon'. With the arrival of the maid, a hierarchy of power is immediately established. Children learn fast that these girls, usually sheltered, inexperienced and ready to please, are easy to manipulate to ensure that their every whim and fancy is attended to. More often than not, this is actually endorsed by the parents themselves.

How does this play out? Toys never have to be picked up and put away by children. I remember clearly the image of my sister's living room with toys, cushions and books strewn all over by my little nephews and nieces. When I asked them to clean up before we called it a night, one of my nephews very reassuringly said, "Don't worry, Aunty. When we are fast asleep, *kakak* will put everything neatly away." Is it any wonder that at twenty-two years of age, this same nephew of mine still has no clue as to how to keep his room tidy?

On a school trip to Japan, my daughter told me about how bags that were obviously packed for the students by their maids, had to be repacked at the end of the trip by the teachers because the children had no idea how to do it themselves. And these were fifteen-year-olds!

30 A Singaporean friend witnessed a most amazingly funny scene where a sturdy young man reporting for National Service duty walked energetically towards the office. Behind him however, lo and behold, was the maid, barely able to lug his overloaded knapsack! **Our neighbours across the Causeway** too seem to be suffering a similar fate of pampered children! Is it really necessary to make our children's lives so 'comfortable'? We send them into society totally unable to fend for themselves even in the most basic circumstances.

35 Recently, there was an 'uproar' in a Los Angeles campus about comments made by an American sophomore about Asian parents actually coming to the campus on weekends to cook, clean and do laundry for their college-going kids. Their presence, she claimed, changed the whole atmosphere of what was designed to be 'student' living quarters. It would be interesting to hear the answer to her question: "Don't Asian parents teach their children how to do anything for 40 themselves?"

45 Malaysians seem to have been struck by this insidious social disease — where live-in maids do every conceivable chores for their children — so much so they fail to grow up equipped to do the most basic things for themselves. I cannot help but wonder if the recent difficulty in procuring maids might be that 'silver lining' to halt this long-glossed over insidious trend of over-pampering our children. Hopefully, it will allow us once again to equip them with the basic skills that allow them to grow into responsible adults who will be a credit to society.

Read the passage and then fill in each blank with the correct form of the word in the brackets.

Before the invention of books, people wrote on stone and clay, on rolls of papyrus made from plants in Egypt, or on dried animal skins in the Middle Ages. But to make a book, a real book as we know today, you need paper and printing.

Paper was perhaps the greatest tool for (36) (*communicate*) until the computer was invented. The best evidence indicates that paper was invented by the Chinese between the years 250 B.C. and 105 B. C. (37) (*History*) studying Asian culture have found more (38) (*convince*) proof that paper was soon used to print money. Paper money is one of the most (39) (*use*) inventions in history, and it greatly helped the (40) (*develop*) of trade and commerce in China.

People make a big mistake when they think that printing is (41) (*entire*) a Western discovery. In fact, the first ideas about printing also came to us from China. The Chinese made the largest contribution to the printing press. It is said that in 11th century China, a blacksmith named Pi Sheng invented the best system for (42) (*print*) with blocks. Did this discovery travel to the West? Did a (43) (*Europe*) make the discovery again by himself? Nobody is sure of the answer. But we do know that Johannes Gutenberg, a goldsmith in the city of Strasbourg, created the first printing press with (44) (*move*) type in Europe around the year 1450.

Without these contributions to paper and printing, it would not have been possible to invent the book, one of the highest (45) (*achieve*) of the last millennium.
