

I. BACKGROUND

Following the first “Sino-UK Higher Education Collaboration on Upcycling of Industry Left-overs” which successfully took place in May 2012 in Guangzhou, Guangdong Province, the British Council China jointly worked with Chinese partners for the 2nd round in Changsha Hunan Province from 10th to 24th May 2013. Apart from higher education institutions from UK and China, the 2nd round was extended to all countries in East Asia and in the end one university from South Korea participated.

The objectives of the collaboration project are as follows:

1. Students: by working together with students from the other countries, students will develop their language skills, team working spirit and intercultural skills, demonstrate their creativity and improve their employability.
2. Universities: some institutional links will be set up as the result of the activities we organise. By working with industry, their curriculum will be improved to be more practical.
3. Enterprises will find an environmental-friendly and energy-efficient way to deal with their industry left-overs.

The collaboration project also falls in Knowledge Economy Partnership strand of IHE programme, BC's global initiative on higher education work, which is aimed at providing a platform and framework for the creation of sustainable, multilateral partnerships that link the higher education sector, government and business communities to drive forward global, regional and national knowledge economies.

II. ORGANISORS AND CONTRIBUTORS:

Organisors:

- British Council China
- Hunan University School of Design
- Guangzhou Low Carbon Industry Association
- Guangzhou Valuda Group Co., Ltd.

Government Support Organisation:

- Hunan Provincial Department of Science and Technology

Media Partner:

- Xiaoxiang Morning Herald

Co-organisors:

- Hunan Industrial Design Association
- Design for Social Innovation and Sustainability (DESI-CHINA)

Business Partners:

- EMG.ART
- Zoomlion Heavy Industry Science & Technology Development Co., Ltd.
- Guangzhou Business and Renewable Resources Management Co., LTD. (GBRM)

III. PARTICIPATING UNIVERSITIES:

Chinese universities:

1. School of Design Hunan University
2. Academy of Art and Design of Tsinghua University
3. College of Art and Design of Yanshan University
4. School of Design of Jiangnan University
5. College of Design and Innovation of Tongji University
6. School of Design of Sichuan Fine Arts Institute
7. School of Industrial Design of Guangzhou Academy of Fine Arts
8. School of Art and Design of Dalian Polytechnic University

UK Universities:

1. Brunel University
2. University of Central Lancashire
3. University of Derby
4. Falmouth University
5. University of Lincoln
6. London Metropolitan University

South Korean University:

1. Hong-ik University(Seoul)

IV. HIGHLIGHTS:

The Round 2 programme was not a repeat of the round one organised last May in Guangzhou. Some highlights are as follows:

• Chinese Government Support

- Mr. Yang Xiaochun, Director of European Affairs, MOE attended the closing ceremony on 24th May and gave an impressive opening remark, highlighting the innovativeness of international collaboration and its importance to environment protection. Mr. Yang said MOE would consider sponsoring the programme next year when it is hosted by Tongji University in Shanghai.
- Hunan Provincial Department of Science and Technology contributed RMB200,000 to the programme and hosted the closing ceremony.
- Several senior government officials visited the upcycling exhibition at EMG.ART and Hero Plaza and sang high praise of the programme. To name a few:
 - Mr. Chen Yong, Former Deputy Secretary General of Guangdong Provincial Government

- Mr. Li Chunhong, Director General of Guangdong Provincial Development and Reform Committee
- Mr. Yu Hongying, Deputy Managing Director General of Guangzhou Low Carbon Industry Association
- Mr. Ma Jinke, Director of Guangzhou Energy Conversion Centre

- **International instead of bi-lateral programme**

- The programme was extended to East Asia region and Hong-ik University from South Korea participated along with 6 UK and 8 Chinese universities. Prof. Lee Soon-in, Chair of International Industrial Design Committee and Dean of Hongik University International Design School for Advanced Studies, was one of the key judges for the competition.

- **New Business Partners**

Apart from Guangzhou Valuda Group Co., Ltd. which has been the major provider of industry leftovers, contribution from the following new business partners were secured:

- EMG.ART contributed marbles as the materials, hosted a party on the evening of 17th May and the Upcycling Design Exhibition at EMG.ART Guangzhou from 8th to 26th June.
- Zoomlion Heavy Industry Science & Technology Development Co., Ltd. contributed heavy industry left-overs and hosted a roundtable talk with designers on 23rd June.
- Guangzhou Business and Renewable Resources Management Co., LTD. (GBRM) contributed automobile industry left-overs as materials.

- **Media Impact**

The project attracted huge media attention, and was widely and extensively covered by Xiaoxiang Morning Herald and other mainstream media in China. Below is a brief summary of the news clippings (till 29 June 2013):

Total no. of reports: 244

Total circulation achieved: 22,970,700

Total media value: RMB7,935,208

To name a few mainstream media in China which reported this programme:

1. Feature webpages

- The feature webpage at qq.com (<http://hn.qq.com/zt2013/sheji/>) attracted 433,356 unique visitors within 40 days.
- The official website of the programme (<http://design.hnu.cn/upcycling>) attracted 87,122 unique visitors within 40 days.

2. Print media and news agencies

- Xiaoxiang Morning Post
- China Daily
- BBC
- Yangcheng Evening News
- Southern Metropolis Daily

3. TV/Radio programmes

- Hunan Satellite TV
- Qinghai Satellite TV (inc. an 18 minutes feature programme)
- Guangdong TV
- Radio Hunan

4. Websites

- hn.qq.com

- o www.sina.com.cn
- o ss.rednet.com.cn
- o www.dolcn.com
- o www.xmnext.com
- o www.hnid.org

5. Blogs:

- o Blog on Sina: 55368 views
- o Blog on qq.com: 16629 views

* Please refer to Annex I for details of the media reports.

V. OUTCOMES:

• **Potential links between higher education institutions and industries**

- o EMG.ART is inspired by the students' creativity on marble left-over design and will modify those with commercialisation and mass production potential to commercialise them into the market.
- o EMG.ART plans to work with UK universities to establish a Sino-UK design centre in Guangzhou. EMG.ART will send representative to join the UK reciprocal visit in September to follow this up.

• **Potential links among higher education institutions from UK, China and South Korea**

This programme generated lots of initial collaborations among higher education institutions from UK, China and South Korea in various forms including **joint programme, student exchange, joint research, visiting fellow scheme** etc. Details are as follows:

Which University	Link with which Overseas University	Collaboration Intentions	How to follow up
Falmouth University (FU)	Hunan University	<ul style="list-style-type: none"> • Student Visits /MA study To invite undergraduates from the three Chinese universities (and other Chinese universities) to attend the FU degree shows and participate in a Sustainable Product Design workshop with Falmouth Level 2 (2nd Year) students in June 2014. The aim would be to develop an interest in exchange with Chinese students attending Falmouth for MA study. • Joint SPD Centre FU plans to jointly establish a Sustainable Product Design Centre in China with the Chinese universities for MA through to PhD study. 	<ul style="list-style-type: none"> • Email exchanges • Market research on joint SPD centre • Chinese Delegation's reciprocal visit in Sept.
	Dalian University		
	Tongji University		
Brunel University	Hunan University Tsinghua University	<ul style="list-style-type: none"> • Joint Research The idea is to develop joint research proposals on the topic of social innovation, in particular in relation to food networks since both Hunan and Tsinghua have projects on this topic. 	<ul style="list-style-type: none"> • Look for research calls on which we can apply • Email exchanges
		<ul style="list-style-type: none"> • Joint Programme On the basis of the LeNS China web platform (http://www.lens-china.org/), the idea is to develop a stronger relationship between English and Chinese universities on the topic 	

		of design for sustainability. Within this framework the idea is to enhance the exchange of learning resources, as well as teaching and students exchange	
University of Central Lancashire (UCL)	Jiangnan University	As UCL already has links with Jiangnan in other subjects (Animation and Fashion), it would be of interest to build a link with Product/Industrial design. Ideas include joint projects, short term student exchange and eventually working towards long term cross course collaboration.	<ul style="list-style-type: none"> • Further contact and discussions
	Dalian University	It would be nice to open discussion with this polytechnic for the opportunity of summer school and short term joint project work, and progression to our MA course.	Follow up contact with tutor and discussion with my Dean to enter collaboration talks.
	Hong-ik University	As we work very closely with Samsung on student projects it would be of interest for us to enter some form of collaboration with a Korean university.	Follow up contact with tutor and discussion with my Dean to enter collaboration talks.
Lincoln University	Hong-ik University	Master programme and MA International Design Enterprise programme at Lincoln	Collaborative design projects. Visit to conduct design workshop or presentations. Possible staff/student exchange. Co-author publication.
	Dalian University	Collaboration between design programme at Dalian and MA International Design Enterprise Programme at Lincoln	
	Tsinghua University	co-authoring design books for Chinese market	
London Metropolitan University(LMU)	Guangzhou Academy of Fine Arts(GAFA)	<ul style="list-style-type: none"> • BA and MA Product Design LMU has already have links with GAFA in architecture, it would be of interest to build a link with Product/Industrial design	Contact Tommy (Mo Lian)
	Hunan University	<ul style="list-style-type: none"> • BA and MA Product Design 	Contact Yi Sun and He Renke
	Tongji University	<ul style="list-style-type: none"> • BA and MA Product Design 	Contact Zheng Xiaoxue

VI. ACTIVITIES:

- **Workshop & Competition**

The key content of the project was a two-week workshop from 10th to 24th May 2013 and a competition for the products worked out from the workshop at the end. 32 students and 16 teachers from 6 UK, 1 Korean and 8 Chinese universities produced over 50 pieces of creative and innovative artworks using industrial left-overs. At the end of the workshop, the best works were selected by professional judges and awarded prizes.

Teachers and students working hard at the workshops

- **International Collaboration Roundtable Talk**

In order to better facilitate the links among UK, China and South Korean higher education institutions and local industries, an international collaboration roundtable talk was held on the afternoon of 16th May, generated lots of initial international collaborations. Please refer to Section V for more details.

Heated discussion on International collaboration roundtable talk

- **Student Lectures**

Two student lectures were organised on the evening of 13th and 20th May respectively and teachers from UK, China and South Korea shared the most updated innovation, creativity and case studies with the local students.

- **Visits to Local Industries**

On 17th May, teachers and students were organised to visit several local industries, including Zoomlion, Yixin Lei Art Studio and Zhaoming Design Studio. From these visits, students and teachers were able to develop a more direct awareness of local industrial design business and a better understanding of the development of industry design in China.

- **EMG Low-carbon Design Party**

On the evening of 17th May, a party was hosted by EMG.ART. This was a networking event where participating students and teachers had the opportunity to meet with local business representatives as well as well-known designers.

Performance by a local band

Happy hours at Networking Low-carbon Design Party

- **Low Carbon Design Forum and Awarding Ceremony**

A forum on International Higher Education Collaboration: Low Carbon Design and awarding ceremony was arranged in the morning of 24th May, attracting over 100 local designers, teachers, students and journalists.

Angus Bjarnason, South China Area Director of British Council, addressed at the press conference

Mr. Yang Xiaochun, Director of European Affairs, Ministry of Education., addressed at the low carbon design forum and the awarding ceremony

- **Exhibition**

Over 50 pieces of artworks produced by the teachers and the students were showcased to general public and industrial design practitioners at the following exhibitions:

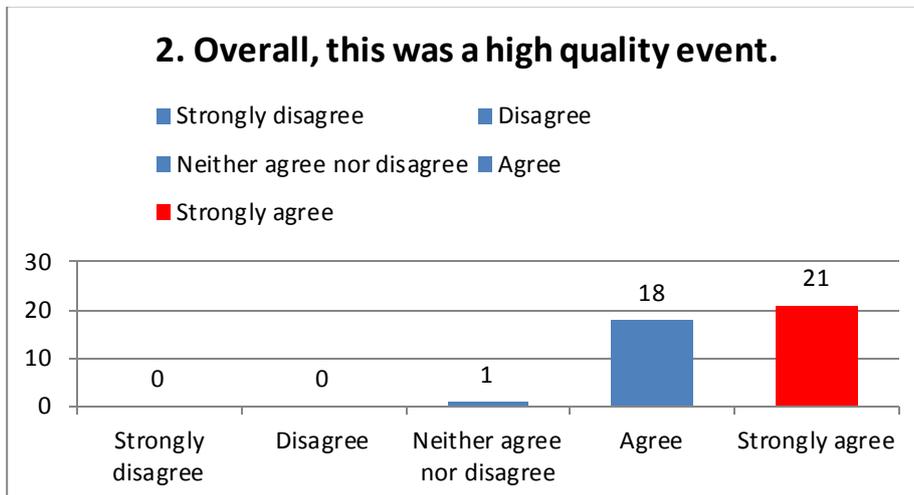

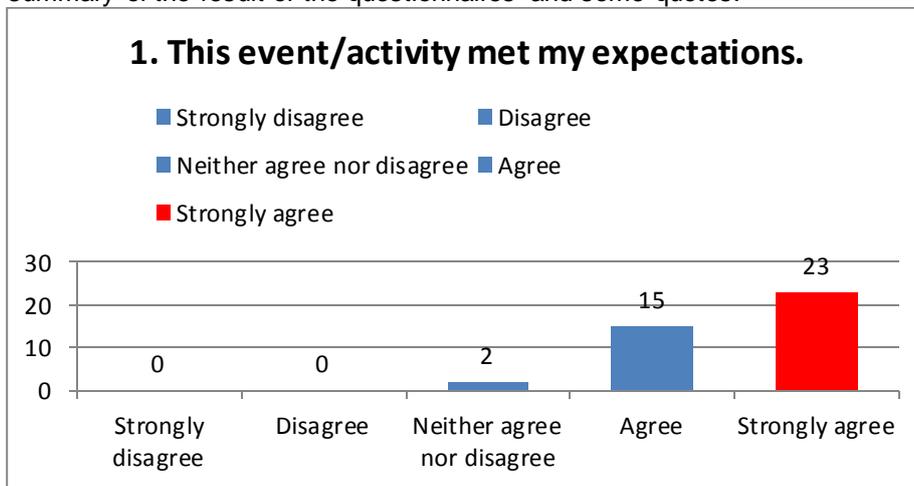

- **Exhibition 1---Hunan Provincial Department of Science and Technology (24th – 29th May)**
- **Exhibition 2---EMG.ART, Guangzhou (8th-26th June 2013)**
- **Exhibition 3---Low Carbon Day at Hero Plaza, Guangzhou(16 June 2013)**

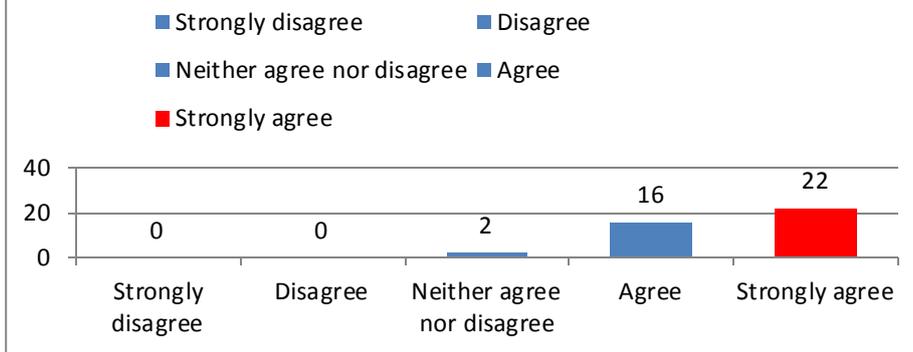

Some of the artworks produced by the teachers and the students

VII. Feedback

The programme received very positive feedback from the participating teachers and students. Below is the summary of the result of the questionnaires and some quotes:

3. I have acquired new knowledge and/or skills from taking part in this event/activity.

Quotes:

"I'm very impressed by its innovativeness of international collaboration and its importance to environment protection! MOE will give full support to projects like this!" said Mr. Yang Xiaochun, Director of European Affairs, Ministry of Education.

"It was such a creative and meaningful project! I'll definitely promote it at our next international industrial design meeting." said Prof. Lee Soon-in, Chair of International Industrial Design Committee.

"It was such a well-organised project and our team learnt a lot from it! We'll definitely participate in the third round." said David Bramston, lead teacher from University of Lincoln.

"What benefited me most is the experience with China and getting to know all the different people. China will be the top priority Country for pursuing my further studies in industrial design." said one of the participating UK students.

VIII. FOLLOW UP PLAN

- BC will organise a reciprocal visit to the UK in Sept 2013 to consolidate the collaborations generated from the programme. Delegates will include the major partner of the project, decision makers from the Chinese and Korean universities and winning teachers and students. The delegation will visit the participating UK universities and 2013 London Design Festival.
- A publication together with a CD which collects pictures and descriptions of all works by UK, Chinese and Korean students will be produced in September 2013. It is expected that the publication can attract wider audience and generate bigger impact as how creativity can be connected with sustainability.
- BC will follow up the initial collaborations among higher education institutions and industries, aiming at generating long-lasting legacy outcomes.
- All partners have shown great interests in continuing this initiative next year and it's agreed that the next round of the programme will be hosted by Tongji University in Shanghai in 2014.
