

Education Conference 2019

Education That Makes A Difference

In its sessions and workshops, the Conference will address studies, research and experiences presented by participants representing several universities and other institutions. The Conference will explore the following topics :

Topic 1: Local and global trends in developing the educational learning process

- Educational competencies and their role in meeting educational needs in the 21st century.
- Specialized schools: STEM practices, a quality education to realize the knowledge-based economy.
- Distance learning: prospects and aspirations for the future of education.
- Centers for inclusion and gifted students: their role in supporting special needs students.

Topic 2 : Education and Cultural Identity

- Educational values and cultural identity in the context of modern education.
- Addressing cultural and national identity through education .
- Instilling cultural identity through school, curriculum, parental engagement, and community.
- Education through dialogue and its role in intellectual and psychological security.

Topic 3: Managing Quality in Education

- Quality management concepts and applications.
- Managing the quality of input and design: from design to measurement to improvement.
- Performance quality: elements of comprehensive quality in education.
- Leading change: Strategies for continuous improvement and enhancing institutional value.
