I. China macro trends

- II. What makes a city attractive?
- III. Benchmarking Chinese cities
- IV. Which cities are the most attractive overall?
- V. Conclusions and recommendations

I. China macro trends: Economy

China's growth is steadily cooling...

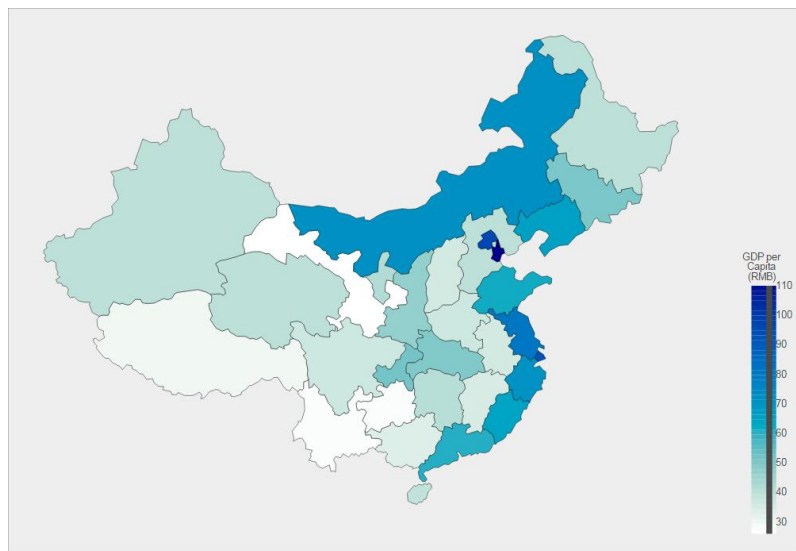

Source: Economist Intelligence Unit

I. China macro trends: Economy

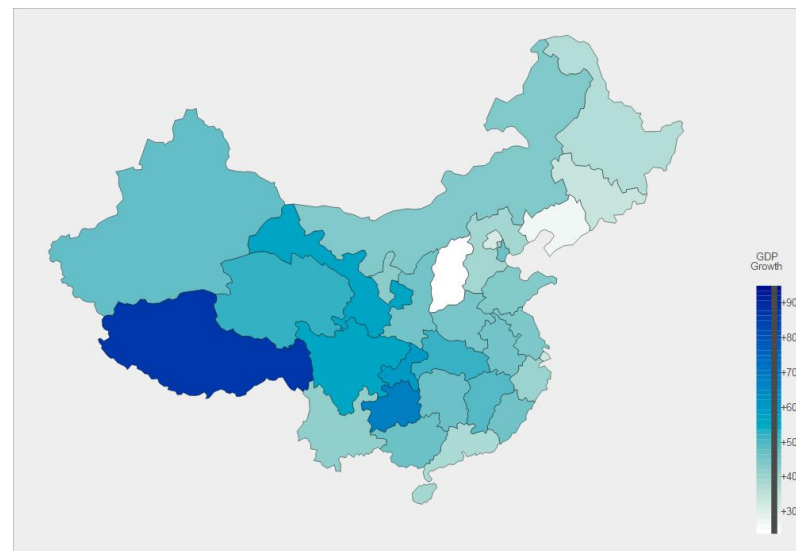

...but some areas will see relatively stronger growth

GDP per capita, 2014

Source: Economist Intelligence Unit

GDP growth 2015-2020 (forecast)

Source: Economist Intelligence Unit

I. China macro trends: Urbanisation

The government's urbanisation plan sets a target of increasing the number of people holding urban residency permits by 100 Mn in the 2014-2020 period

I. China macro trends: Urbanisation

China's fastest growth is taking place in some unfamiliar places

Source: Economist Intelligence Unit

I. China macro trends: Demographic shift

From demographic dividend....

...to demographic deficit

Source: populationpyramid.net

I. Macro trends: Demographic shift

China's student populations are starting to contract

Source: Ministry of Education

- I. China macro trends
- II. What makes a city attractive?**
- III. Benchmarking Chinese cities
- IV. Which cities are the most attractive overall?
- V. Conclusions and recommendations

What makes a city attractive for overseas universities?

Two main factors:

Number of Potential Students

- Secondary students
- HE students
- Student-age population growth

Two secondary factors:

Student ability

- Academic level
- English ability

And competition

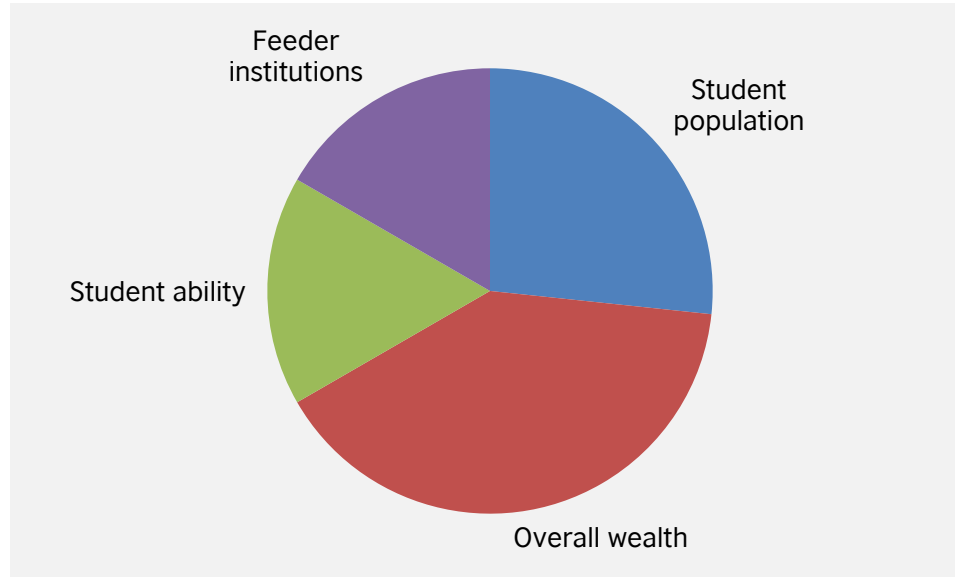

Level of wealth

- Average incomes
- High-income population
- Willingness to spend
- Income growth

Feeder / partner institutions

- Universities
- International schools

Weighting the different factors

Source: British Council

Quick preview of results

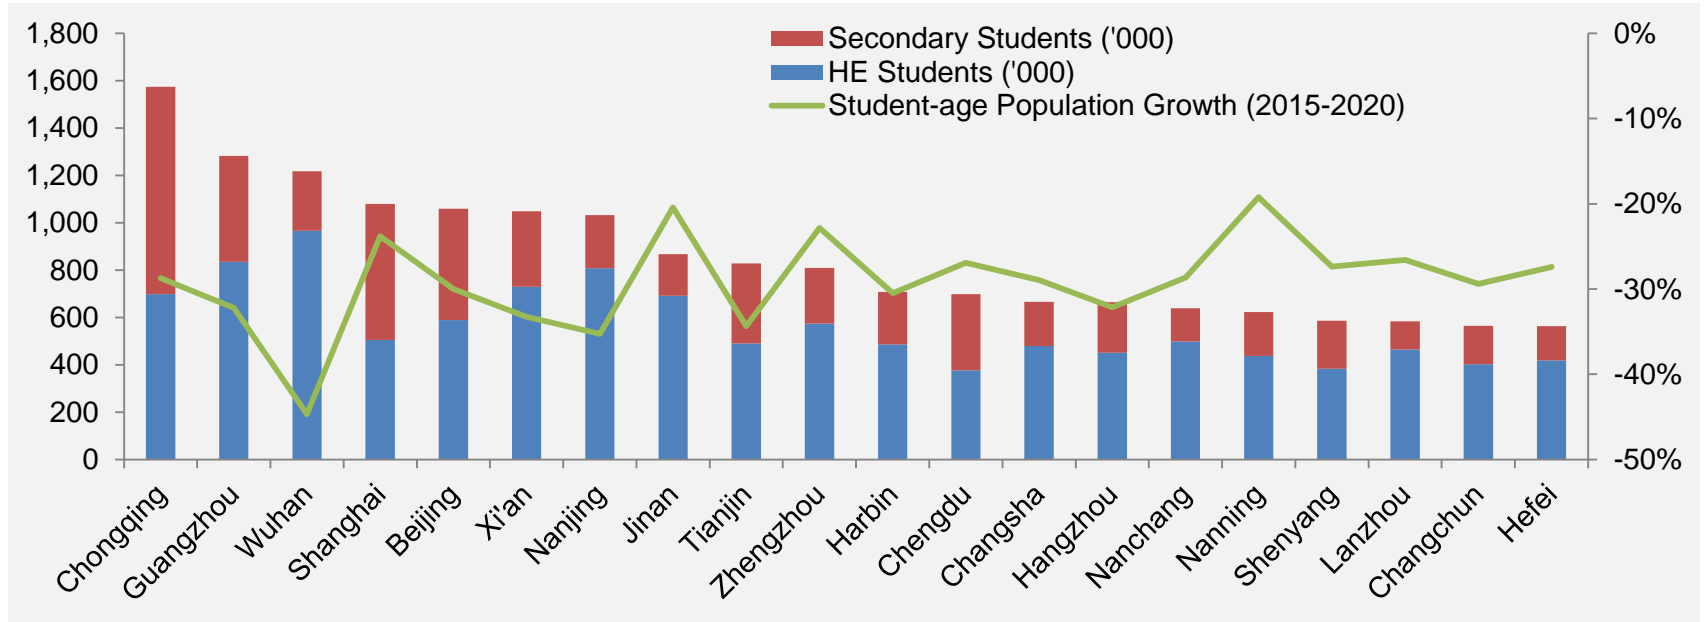

- I. China macro trends
- II. What makes a city attractive?
- III. Benchmarking Chinese cities**
- IV. Which cities are the most attractive overall?
- V. Conclusions and recommendations

Benchmarking Chinese cities:

- i. **Where are the students?**
- ii. Which cities have the most money?
- iii. Where are the best students?
- iv. Who can you work with?

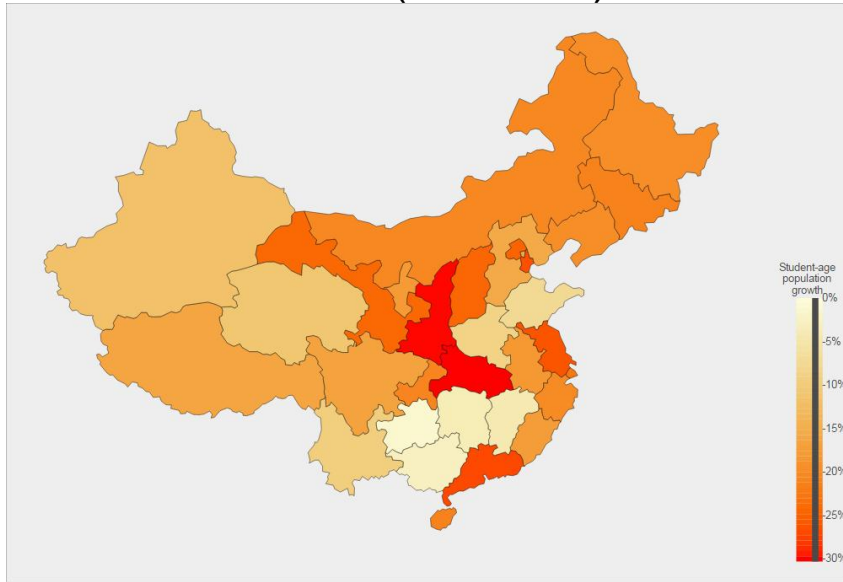

Student Population – Size is critical

Top cities by metropolitan student population (secondary plus HE)

Most developed areas are facing a population decline

Student-age Population Growth, 2015-2020 (Forecast)

Source: EIU

Recent and forecast student-age population - West China & elsewhere

Source: EIU

Overall attractiveness by population size

Benchmarking Chinese cities:

- i. Where are the students?
- ii. Which cities have the most money?
- iii. Where are the best students?
- iv. Who can you work with?

But despite slower growth, the list of top cities will see little change

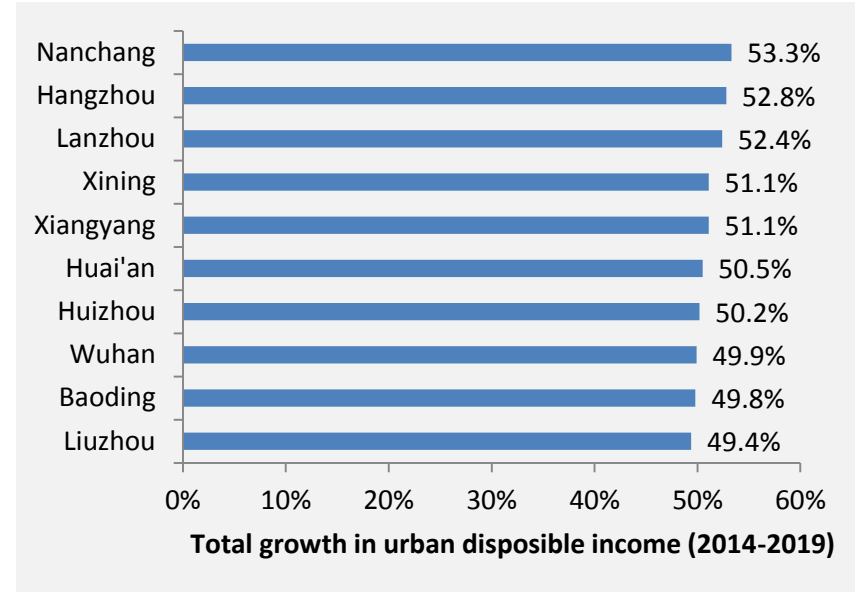

Top cities by average urban income*

* Population > 1 Million

Case Studies

Source: British Council, Ministry of Education

Case Study: Hangzhou

One of China's oldest and richest cities

- Capital of Zhejiang province – one of China's most developed provinces
- Population 9.1 Mn (5.6 Mn metropolitan)
- Ranked second in our “Wealth index” – high income, many wealthy individuals, and stronger growth than other rich cities
- Home to many internet and high-tech firms, most famously Alibaba
- 180 km from Shanghai

West Lake. Image Source: Vmenkov (Creative Commons)

Higher education in Hangzhou

Large number of universities

- As provincial capital, it is the HE hub of Zhejiang province
- 25 universities granting bachelor's degrees, plus 450,000 HE students
- One of these is Zhejiang University, one of China's most elite universities
- ...but no other Project 211 universities, although some others are well regarded (e.g. Zhejiang University of Technology)

Hangzhou Dianzi University campus. Image source: Hangzhou Dianzi University

TNE in Hangzhou

The UK is underrepresented in TNE

- One joint institute and 37 joint programmes (24 undergraduate, 13 postgraduate) – roughly in line with student population size
- Leading subjects are computer science, finance, and civil engineering
- Six joint programmes with UK universities, at five different institutions
- No UK university has more than one joint programme in Hangzhou

Joint programmes and institutes in Hangzhou, by partner country

Source: Ministry of Education

Case Study: Xiamen

A developed but non-capital city

- Coastal city on the Taiwan Strait
- Metropolitan population of 3.6 Mn – slightly larger than Fujian's capital Fuzhou
- Also richer than the provincial capital in terms of average incomes and high-income individuals
- Key industries include electronics, chemicals, maritime industries and pharmaceuticals.

Xiamen cityscape. Image Source: Miramimi (Creative Commons)

Higher Education in Xiamen

Relatively small number of universities

- Only six universities in the city granting bachelor's degrees. 150,000 HE students in total (including higher vocational)
- One, Xiamen University, is a Project 211 institution. Generally rated as the best university in Fujian province.
- Most of Fujian's universities are in the capital Fuzhou – but Xiamen is still a “net importer” of HE students

Xiamen University campus. Image Source: Xiamen University

TNE in Xiamen

Relatively little TNE – and none from the UK

- Only seven joint programmes (six undergraduate, one postgraduate)
- Three of Xiamen's universities offer TNE courses – all have multiple programmes
- Most popular programmes are environmental engineering and accounting – both offered at two universities
- No joint programmes with UK universities

Joint programmes and institutes in Xiamen, by partner country

Source: Ministry of Education

Case Study: Changsha

A provincial capital in Central China

- Capital of Hunan Province in South-Central China, as well as the province's largest and wealthiest city
- Population of 3.2 Mn (metropolitan) / 7.3 Mn (administrative area)
- Important industries include construction machinery, new materials, automotive parts and logistics – but also cultural and creative industries anchored by Hunan TV.

Changsha cityscape. Image Source: Bilae Boyce (Creative Commons)

Higher Education in Changsha

HE hub for Hunan province

- 25 universities, and almost 480,000 HE students from around Hunan province and beyond
- Four Project 211 institutions: Hunan University, Central South University, Hunan Normal University, and the National University of Defence Technology
- Central South University usually seen as the city's (and province's) top institution

*Central South University library.

Hunan University administration building. Image Source: Geographer (Creative Commons)

TNE in Changsha

The UK is the local leader in TNE

- A total of 10 joint programmes and one joint institute, at seven different institutions
- The UK is the local market leader, with four joint programmes plus one joint institute
- All are either in business-related or science/engineering subjects –accounting, civil engineering and environmental science each have two programmes

Joint programmes and institutes in Changsha, by partner country

Source: Ministry of Education

- I. China macro trends
- II. What makes a city attractive?
- III. Benchmarking Chinese cities
- IV. Which cities are the most attractive overall?
- V. Conclusions and recommendations**

Conclusions and recommendations

Less developed areas have high growth, but Tier 1-2 cities are still more attractive

- Directly governed municipalities
- Most provincial capitals
- Other large cities in more developed areas

Size and wealth are the most important factors

- All else being equal, wealth has a larger effect on potential international students
- Different strategies are needed for wealthier and less wealthy cities

Strong brain drain towards a few areas

- Students in the top 20% of gaokao scores are far more likely to leave their province

International schools are valuable, but mostly concentrated in a few cities

- More than doubled in the last five years – and no sign of slowing down
- Almost all graduates go abroad to study

Cities have their own subject focus

- Most cities have development plans focusing on particular sectors

Thank you!

Any questions?
